Argo / NVS / OceanOps meeting - 29-Mar-2022

Attendees

BODC	Violetta Paba Clare Bellingham Roseanna Wright
OceanOps	Victor Turpin, Magali Kreiger
EuroArgo	Romain Cancouët

Agenda

Review actions from Argo / NVS / OceanOps meeting - 13-Jan-2022

PI_NAME vocab progress (Roseanna)

CONTROLLER_BOARD (R28) vocab progress (Clare)

DEPLOYMENT_PLATFORM/C17 progress (Violetta)

PROJECT_NAME/PROGRAM vocabulary - https://github.com/nvs-vocabs/ArgoVocabs/issues/5

Notes

In OceanOps, PROGRAM contains both programs (ongoing) and projects (time-limited).

In Argo, PROJECT_NAME is defined in the NetCDF as 'Program under which the float was deployed'

❓ What's the difference between the two? Is the distinction between them important?

R. Anderson from WHOI suggests separating the two:

"PROJECT_NAME": which represents the project that is funding (e.g. NOAA, GO-BGC)
(new): "PROGRAM" or "OPERATING_INSTITUTION": the program that operates the float.

(new): "FUNDER" or "AGENCY" or "FUNDING_AGENCY" field, to explicitely define the funding agency

OceanOps (Victor) suggests creating these two new fields, instead of PROJECT_NAME:

NETWORK - 'tag', i.e. unconstrained?

NETWORK_TYPE - vocab?

Minutes

Outstanding issues

❓ Shall we discuss DEPLOYMENT_CRUISE_ID, BATTERY_TYPE and BATTERY_PACKS?
